Precautions in our school
special education / special primary education

We can safely go to school if everyone does the following:

**Pupils and staff stay at home:**
- Nose cold, coughing, difficulty breathing/tightness of the chest, sudden loss of smell or taste, or a fever above 38 °C.
- Also stay at home if a family member has a fever above 38 °C and/or an anxiety disorder.
- 24 hours without symptoms = back to school.

**Risk groups**
Pupils and educational staff who belong to the at-risk group, or whose family members belong to the at-risk group, can stay at home. Contact the school management about this.

**Distance**
- Between children: 1.5 m distance not necessary.
- Between teaching staff and child: preventively 1.5 m distance wherever possible (less distance poses no danger, but see what can be done).
- Between adults: always 1.5 m distance.

**Wash your hands more often and use paper towels**

**Cough and sneeze on the inside of your elbow**

**Use paper handkerchiefs**

**Do not shake hands**

**Breaks** are only held with the child’s own class. **After school**, everyone goes straight home.
